

**Have you been pregnant or had a baby in the past year or two?**

**What makes it easier or harder for you to get the kinds of care you need?**

**Would you like to share your story to help find ways to make care better?**

**JOIN THE EVERYWOMAN STUDY TO HELP US UNDERSTAND AND IMPROVE WOMEN’S HEALTH CARE IN COMMUNITY HEALTH CENTERS!**

Our team is learning about how women get health care – to stay healthy, figure out when to get pregnant, or get care while pregnant or after their pregnancy is over. We want to hear about care you’ve needed and what has made it easier or harder for you to get care. Have you been able to get the care you need? Have you gotten it where you wanted to? Have things like Medicaid or insurance made a difference in choosing what kind of care or where you go?

If you are between 16 and 44 years old and have been pregnant or had a baby in the past year or two, we would like to hear your story! We will talk to you over the phone for about an hour to hear about:

- The kinds of care you need and have needed in the past
- Where you usually get your care
- How your provider talks to you about your health and your care needs
- How you pay for your care
- How state and national policies like the ACA or Obamacare have changed the care you get
- Things that make it easier or harder for you and the women you know to get care

To say thank you for your time sharing your story and talking to us, we will send you a \$50 gift card.

This project will help make women’s health care better by looking for the biggest problems women have in getting care and finding ways to try and solve those problems, especially for women who have a hard time finding or paying for care.

Please call us at 503-943-2500 or email us at [templetona@ochin.org](mailto:templetona@ochin.org), if you are interested in taking part!
