

EVERYWOMAN | Reproductive Care in the Safety-Net: Women's Health Care after Affordable Care Act Implementation

- *Term: 09/01/2017 – 05/31/2022*
- *Grantee: OCHIN, Inc.*
- *Sub-recipients: Oregon Health & Science University, Health Choice Network, Fenway Health*
- *Funding Agency: Agency for Healthcare Research and Quality*
- *Grant Number: 1R01HS025155-01*

EVERYWOMAN will examine the impact of the Affordable Care Act (ACA) and state level reproductive health policies on the full spectrum of women's health care provision and health experiences in safety-net populations. EVERYWOMAN applies a mixed-methods approach comprising patient-level electronic health record (EHR) data for large scale quantitative analyses, qualitative observations, and semi-structured interviews with patients and providers to understand perceptions and patterns of care delivery and utilization, and review of state-level reproductive health policies in inform our analyses.

Potential Impact

Findings from this study will identify practice and policy efforts to strengthen the provision of timely, effective, evidence-based reproductive health care. Study findings will impact patients and providers through relevant practice and policy changes to improve health outcomes and reduce disparities among low-income vulnerable populations of women
